

# Report of the Practical Work

## Final Report

H. Bertiche   A. Brando   J. Camps   M. Leyva   V. Roig

<sup>1</sup>Department of Computer Science  
University Rovira i Virgili

Introduction to MultiAgent Systems (IMAS), 2015-2016

# Outline

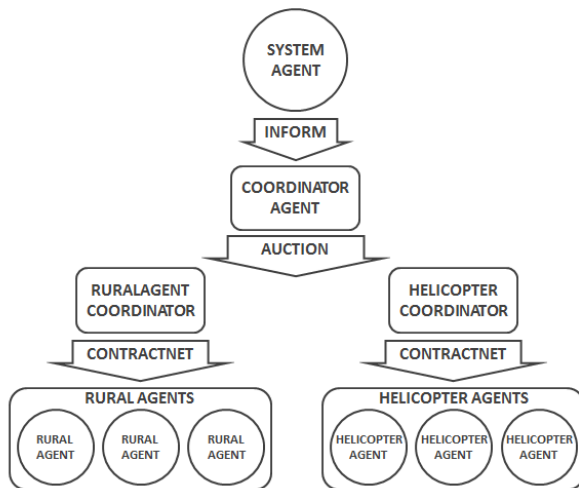

- 1 Our MultiAgent System
  - RECALL: Architecture
- 2 Our MultiAgent System
  - Graph algorithm for Rural Agents
- 3 Application to our agents
  - Cooperation of RuralAgents with their Coordinator
  - Cooperation of HelicopterAgents with their Coordinator

# Outline

- 1 Our MultiAgent System
  - RECALL: Architecture
- 2 Our MultiAgent System
  - Graph algorithm for Rural Agents
- 3 Application to our agents
  - Cooperation of RuralAgents with their Coordinator
  - Cooperation of HelicopterAgents with their Coordinator

# Our MultiAgent System

## RECALL: Architecture

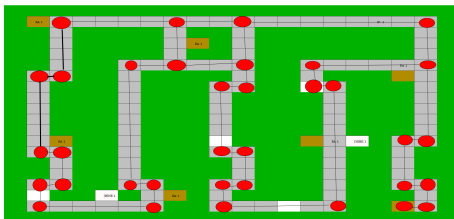

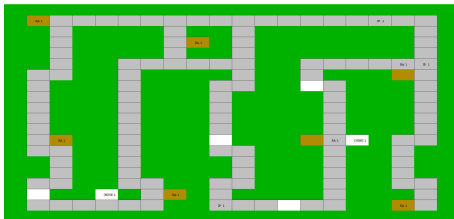

# Outline

- 1 Our MultiAgent System
  - RECALL: Architecture
- 2 Our MultiAgent System
  - Graph algorithm for Rural Agents
- 3 Application to our agents
  - Cooperation of RuralAgents with their Coordinator
  - Cooperation of HelicopterAgents with their Coordinator

# Our MultiAgent System

## Graph algorithm for Rural Agents

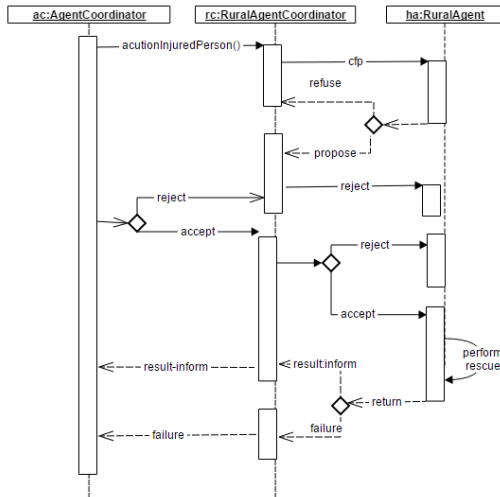

# Outline

- 1 Our MultiAgent System
  - RECALL: Architecture
- 2 Our MultiAgent System
  - Graph algorithm for Rural Agents
- 3 Application to our agents
  - Cooperation of RuralAgents with their Coordinator
  - Cooperation of HelicopterAgents with their Coordinator

# Application to our agents

## Cooperation mechanism of RuralAgents with their Coordinator

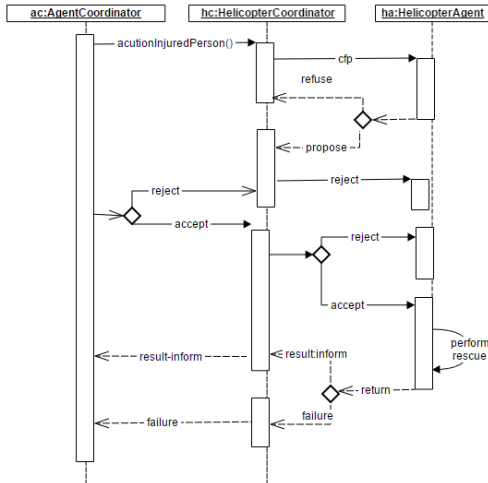

## Special considerations

- Dealing with avalanches

# Application to our agents

## Cooperation mechanism of HelicopterAgents with their Coordinator

## Special considerations

- Landing and taking off from hospitals
- Rescuing people from the same cell

# Bibliography I

Antonio. Moreno.

*Introduction to Multi-Agent Systems.*

Lectures from 5 to 10.

Wooldridge, M. (2009).

*An introduction to multiagent systems.*

John Wiley & Sons.

Khan Majid Ali ,Boloni Ladislau (2007).

*Coalition Formation and Teamwork in Embodied Agents.*

University of Central Florida

Durfee, E. H., & Lesser, V. R. (1991).

Partial global planning: A coordination framework for distributed hypothesis formation.

*Systems, Man and Cybernetics, IEEE Transactions*
